

Protocol Physicals:

Protocol medical clearances are exams, based on regulatory requirements that provide surveillance for potential exposures or certification for specific jobs. Documents that prescribe recommended testing include NASA Procedural Requirements (NPR's), Langley Procedural Requirements (LPR), OSHA standards, NIOSH recommendations, and other occupational health sources.

Determining who should be placed on a protocol is accomplished by supervisors working with industrial hygienists (IH) and Safety specialists based on Job Hazard Analyses and audits.

The Langley Form 66 (LF66) is available at http://lms.larc.nasa.gov/forms_list.cfm. It must be completed with appropriate signatures and delivered to the clinic at Mail Stop 281 before a civil service employee will be scheduled for a protocol examination. For contractors please call the clinic at x43195.
